Version: 3.1

1. INTRODUCTION

Welcome to Armoury Broker, operated by Armoury Broker (Pty) Ltd (Registration Number: 2024/762433/07). These Terms of Use govern your access to and use of our cloud-based multi-vendor marketplace platform, services, applications and tools (collectively "Services").

2. ABOUT ARMOURY BROKER

Armoury Broker is a cloud-based multi-vendor marketplace that addresses market inefficiency by establishing a formalized platform for armoury-related equipment. The system facilitates peer-to-peer transactions—buying, selling, trading, raffling, and auctioning—of tactical equipment, peripherals and non-firearm merchandise within a secure framework. Built on principles of trust and security, the platform delivers end-to-end transaction management, including escrow-based payments and comprehensive buyer-seller protection.

Operating as a structured marketplace, Armoury Broker responds to the growing demand for both new and used armoury equipment while creating value through enhanced trust, regulatory compliance, and improved market efficiency. The platform provides a legitimate channel for South Africa's tactical and outdoor equipment community while enabling better oversight and security. Please note that Armoury Broker (Pty) Ltd is not a licensed firearms dealer and does not facilitate the sale, purchase, or transfer of firearms on the platform at this time. The platform is limited to tactical equipment, peripherals, and non-firearm armoury-related merchandise.

6.1.3. Browsing, saving to favourites, and buying products from other users

6.1.4. Communicating with other platform users through private messages

6.1.5. Sharing advertisements of goods being sold on the platform on various social media channels

6.2. ESCROW AND PAYMENT SERVICES

6.2.1. Armoury Broker provides secure funds deposit services for the performance of sales contracts concluded by users.

6.2.2. When making a purchase, the buyer transfers the purchase price, inclusive of all applicable platform and delivery charges to Armoury Broker through available payment methods including Instant EFT, debit / credit cards, or any other payment options available on the platform.

6.3. PAYMENT AGENT APPOINTMENT

6.3.1. The seller hereby appoints Armoury Broker (Pty) Ltd to act on its behalf as its limited payment agent to accept payment on its behalf for goods sold through the platform.

6.4. CURRENCY

6.4.1. All purchase and sales transactions on the platform must be conducted in South African Rands.

6.5. PURCHASE AND SALE PROCESS

The transaction process operates as follows:

- **Step 1: Purchase Initiation** The buyer finds a product or service of interest on the platform and makes payment through one of the available payment options on the platform.
- **Step 2: Payment Processing** The purchase price, inclusive of all platform charges, delivery charges and applicable taxes (VAT) is collected by one of the Armoury Broker payment gateway provider platforms, whereafter it is transferred to Armoury Broker's account, acting as the seller's limited payment agent to receive payment on their behalf from the buyer.
- **Step 3: Delivery Method Selection and Payment** The buyer selects their preferred delivery option from what the seller has made available during the listing of the item. Any applicable delivery fees are added to the total purchase price unless the seller has enabled "free delivery" or "drop off / collection". For Pudo courier delivery, the delivery charge is calculated automatically via the Pudo API based on package size and delivery distance, and is collected from the buyer at the time of purchase. Armoury Broker holds the Pudo courier account and will apply the collected delivery funds to that account to cover the shipment cost. No additional markup is applied —

the buyer pays the exact Pudo API rate. For collection or free delivery, no courier charge applies..

- **Step 4: Shipping/Delivery Confirmation** The seller confirms the shipping or collection of goods to the buyer via the platform by clicking the **'Order Dispatched'** button. For Pudo shipments, the order status will update automatically to "Shipped" once the item has been deposited at a Pudo locker or collection point, and Pudo tracking information will be available on the platform.
- **Step 5: Delivery Confirmation** The buyer confirms receipt of goods through the platform by clicking the **'Order Complete'** button and confirms in the following pop-up that they are satisfied with the goods and agree to release the purchase price to the seller's Armoury Broker wallet.
- **Step 6: Payment Release** Armoury Broker thereafter releases the payment to the seller's Armoury Broker wallet, and the sales transaction is deemed completed (unless the transaction is reported for any reason).
- **Step 7: Payout Process** To transfer funds to the seller's bank account, the seller must initiate the payout process by clicking the **'Request Withdrawal** button. Once initiated, Armoury Broker will transfer funds to the seller's bank account. Payments are made weekly on a Wednesday and will include all withdrawal requests made before 23:59 the preceding Tuesday.

6.6. BANKING REQUIREMENTS

6.6.1. The seller's banking details must be from a recognised South African bank. It is the seller's responsibility to ensure that banking details provided are accurate, up-to-date and linked to a South African bank account from a recognised bank.

6.6.2. Armoury Broker will not be held responsible for any delays or losses incurred as a result of funds transfers to the provided account.

6.7. TRANSACTION CONFIRMATIONS

6.7.1. Both buyers and sellers involved in transactions will receive notifications on the platform and via their registered email addresses for all activities that form part of the sales transaction.

6.7.2. Confirmation notices and emails will be sent to both parties for the following transaction milestones:

- Item purchase confirmation
- Funds received confirmation
- Item shipped notification
- Item received confirmation
- Funds release notification

6.7.3. These notifications ensure full transparency and provide both parties with a complete transaction record throughout the sales process.

6.8. DELIVERY OPTIONS AND COURIER SERVICES

6.8.1. Armoury Broker integrates with Pudo as its selected courier partner. Delivery charges are calculated automatically via the Pudo API based on package size and delivery distance, and are presented to the buyer at checkout. Sellers may also offer collection or free delivery at their discretion.

6.8.2. When purchasing an item, buyers select their preferred delivery option from the available list provided by the seller, which may include:

- Pudo courier delivery (Armoury Broker integrated — charges calculated via Pudo API at checkout)

- Collection / Delivery (buyer collects / seller delivers)
- Free delivery (at seller's discretion)
- Collection / Delivery (buyer collects / seller delivers)

6.8.3. Pudo Courier Payment Process: When a buyer selects Pudo delivery at checkout, the Pudo API automatically calculates the delivery charge based on package size and delivery distance, and books the shipment automatically as part of the checkout process. This charge is collected from the buyer at the time of purchase, together with the item price and applicable platform fees. Armoury Broker holds the Pudo courier account and the collected delivery funds are applied directly to that account to settle the shipment cost. No markup is added — the buyer pays the exact Pudo API rate. Upon successful checkout, the seller will receive a Pudo drop-off code or label via the platform and must deposit the item at their nearest Pudo locker or collection point within the specified timeframe. The order status will update automatically to "Shipped" once the item has been deposited.

6.8.4. Free Delivery and Collection: No additional delivery fees apply when the seller enables "Free delivery" or when "Collection / Delivery" is selected as the delivery method.

6.9. PAYMENT LIMITATIONS

6.9.1. The user's right to purchase on the platform is subject to any limits Armoury Broker or our payment processors may establish.

7. SERVICE FEES

7.1. SELLER FEES

7.1.1. Opening a shop, adding items to the Armoury Broker platform, and listing items for sale is free of charge.

7.1.2. Sellers have the flexibility to charge, split, or absorb the platform fees when listing their items. Pudo delivery charges are collected directly from the buyer at checkout and are not a seller cost.

7.2. PLATFORM FEES

7.2.1. All transactions are subject to platform fees to ensure secure transactions and comprehensive protection services.

7.2.2. Armoury Broker charges a platform fee to the buyer for facilitating transactions through our secure marketplace. This fee is calculated as the greater of R25 or 5% of the transaction value (including item price and applicable delivery/courier charges) and is payable by the buyer at the time of purchase (unless the seller has chosen to split or absorb this fee).

7.2.3. The Armoury Broker platform fee further **includes** the selected payment transaction fee that will be charged by the selected payment gateway provider. Armoury Broker will settle these charges with the gateway provider directly and this therefore means that the greater of R25 or 5% of the transaction value is the total charge to the platform user for making use of the Armoury Broker Services.

7.2.4. Armoury Broker reserves the right to amend the platform fee at anytime should there be a reason to do so.

7.3. PLATFORM FEE REFUND POLICY

7.3.1. If an order is cancelled due to the item not having been shipped by the seller, the full amount including the platform fees will be refunded to the buyer.

7.3.2. If an order is cancelled in accordance with the buyer's right to return the item (as outlined in Section 13 of these Terms), the full amount including the platform fees will be refunded to the buyer.

7.3.3. Armoury Broker reserves the right to charge the platform fees if an order is cancelled in violation of these Terms.
